

BB FIRST STEP **(Medicated)**

MEDICATED –CTC DENAGARD to help prevent Scours in the nursery..

QUALITY PROTEIN SOURCES – Fish meal, cheese meal, soybean meal, and dried whey combined for a palatable,high performance nursery diet.

MILK PROTEIN- Maximum growth potential,feed palatability, from the high digestibility of these protein sources.

CHELATED MINERALS- Trace minerals including iron that are more biologically available to improve weaning stress, reduce mortality and improve the immune system.

SELENIUM YEAST- A proven antioxidant that builds a strong immune system to enhance baby pig health.

STEAM ROLLED OATS- Important fiber sources added for feed consumption, digestibility and to maintain a healthy digestive tract in young pigs.

SUGAR SOURCES- Molasses provides sweetening affect for improved palatability plus a rapidly digestible source of .energy.

AMINO ACID BALANCE- 20% crude protein and high lysine levels balanced with the other essential amino acids.

ADDED FAT – Higher energy levels improves daily gain and feed efficiency.

FEED TYPE- COMPLETE

FEED FORM- MEAL

CODE# 60101

FEEDING DIRECTIONS

Begin feeding BB First Step as a creep feed to baby pigs. Feed on a continual free choice basis for 14 days. Allow 5 to 7 days to make a gradual feed change. Provide adequate feeder space and adjust feeders to prevent feed wastage. Provide plenty of fresh clean water at all times..

WARNING ; Withdraw two days before slaughter.

CAUTION : Do not feed other than to young pigs.The effects of Tiamulin on reproductive performance, pregnancy, and lactation have not been determined.Use as the only source of Chlortetracycline and Tiamulin.Swine being treated with Tiamulin should not have access to feeds containing polyether ionophores e.g.Monensin,lasalocid,Narasin, Salinomycin, and Senduramicin. If signs of toxicity occur, discontinue use of medicated feeds.
