### FEEDING DIRECTIONS

Feed BB Hefty Hog to finishing pigs weighing 50# or more. Make sure that an adequate supply of fresh clean water is available at all times. A High level of lysine is provided to permit a rapid growth of lean tissue. Adjust feeders carefully to prevent feed wastage, but open enough to provide a constant supply of feed. Pigs should be dewormed with a broad spectrum dewormer at the start of the feeding period. Keep feeding floors clean to prevent the spread of disease and to improve efficiency. See your Buckley Bros. Inc. Swine specialist for your specific needs.
