

BB OPTI-LAY MINI PELLET

MINI-PELLET FORM- Birds can consume the product easily with less waste.

18% CRUDE PROTEIN- High amino acid levels to help hens achieve maximum egg production with improved feed efficiency

HIGH CALCIUM LEVELS- Important for maintaining egg shell quality. Higher calcium levels result in a stronger egg shell even in larger eggs

FORTIFICATION- Meets or exceeds the nutritional standards for layer hens by the National Research Council

MINERALS AND VITAMINS- Contains the balanced levels of Micro and Trace Minerals along with vitamins for maximum egg production and shell strength

NATURAL PROTEIN SOURCE- Combines several protein sources including Fish Meal to provide high levels of lysine and methionine, key amino acids for egg production and bird health.

MANAGEMENT OF LAYER HENS

- Hours of daily light will affect rate of lay.
- Pullet management programs will affect rate of lay.
- 20Wk old pullets should have daily light increased by 15 minutes/day/wk to a maximum of 17hrs of light per day.
- Egg production gradually decreases during the hen's lay cycle.
- Keep feeders and waters clean. Use disinfectant weekly on waterers.
