FEEDING DIRECTIONS

Start feeding BB Atomic after weaning or shipping (400Lb weight cattle or heavier). Allow a 7 to 10 day transition by changing feeds gradually. BB Atomic is a complete texturized feed with cottonseed hulls added to reduce digestive upsets. Feed a minimum of three pounds of hay/head/day. Provide adequate bunk space. Practice good feed bunk management by keeping bunks clean and dry. Vaccinate calves for Enterotoxaemia. Observe fir signs of sickness or bloat. Make sure calves have plenty of fresh clean water.
