

BB OPTI-LAY 16

MASH

CODE # 21615

MASH FORM- Lowest feed cost per dozen eggs.

SELENIUM YEAST – At .3ppm level, this important antioxidant can improve selenium levels in the muscle, whole egg, egg yolk, egg albumen, egg shell, and egg yolk, and shell membranes, improving egg shell quality by increasing shell thickness, specific gravity, and/or breaking strength. It also may improve haugh units, a measure of internal egg quality and freshness, improved egg yolk color, and increased Vitamin E levels.

CALCIUM & CHELATED MANGANESE
Important for maximizing egg shell strength. Higher calcium levels provided for stronger egg shells.

MINERALS AND VITAMINS- Balanced levels of minerals and vitamins for maximum egg production and bird health..

NATURAL PROTEIN SOURCES - Combines several plant and fish meal sources of protein to achieve the high methionine (amino acid levels) necessary for egg production and beautiful feathering..

MANAGEMENT OF LAYER HENS

- Hours of daily light will affect rate of lay.
- Pullet management programs will affect rate of lay.
- 20Wk old pullets should have daily light increased by 15 minutes/day/wk to a maximum of 17hrs of light per day.
- Egg production gradually decreases during the hen's lay cycle.
- Keep feeders and waters clean. Use disinfectant weekly on waterers.

FEED TYPE- COMPLETE GRAIN

FEED FORM- MASH

PURPOSE STATEMENT- A High Quality Mash Feed For Egg Laying Chickens, Turkeys, Ducks, and Geese

GUARANTEED ANALYSIS

Crude Protein (Min).....	16.00%
Lysine (Min).....	0.80%
